Hi Susmita,

Thanks so much for providing the background information. I was hoping to spend the next few days becoming familiar with the petition for review, as well as conformity requirements in general.

Ex. 5 - Attorney Client

Thank you, and we're looking forward to working with you on this!

Mai

Hi Susmita,

Certainly, that's fine. I'll be telecommuting tomorrow and can see the response, or if there's questions – please call my office number and I'll get back to you.

Laura – got your voicemail and thanks!

Tim

DRAFT-DRAFT 6-6-16

=====

Hi Everyone,

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

EPA's November, 2015 PM Hot-spot modeling guidance ("Transportation Conformity Guidance for Quantitative Hot-spot Analyses in PM_{2.5} and PM₁₀ Nonattainment and Maintenance Areas") notes the following in section 9.3.4 *24-hour PM₁₀ NAAQS*:

Calculating Design Values and Determining Conformity

The 24-hour PM₁₀ design value is calculated at each receptor by directly adding the sixth-highest modeled 24-hour concentrations (if using five years of meteorological data) to the appropriate monitor value for the 24-hour background concentration from three years of monitoring data, based on Exhibit 9-6.¹⁵³ Exhibit 9-6: Monitor Value Used for Design Value Calculation

Number of Background Concentration Values from	Monitor Value Used for Design Value Calculation
---	--

the Monitor

< 347	Highest Monitor Value
348 -695	Second Highest Value
696 -1042	Third Highest Value
1043 -1096	Fourth Highest Value

PM₁₀ data from the Commerce City monitoring site is provided in the table below:

EPA/OTAQ Table of Data

Year	N	Highest value	2 nd highest	3 rd highest	4 th highest
2013	357	144	97	93	89
2012	308	113	86	76	75
2011	351	82	65	64	61

“N” = the number of days of valid data recovery.
